

## Job Description

### Senior Front End Engineer

- ✓ Full time
- ✓ 100% Remote
- ✓ Permanent
- ✓ EST time zone

You will engineer sleek solutions for visualization, presentation, and interaction with high volumes of semantically-rich longitudinal business intelligence data, resulting in beautiful and easy to use web applications that render a consistent output. You have experience developing in OSX. You are comfortable with change. You've had positive experience working for a startup before. Your users: non-technical enterprise subject domain experts, in both desktop and mobile settings. Educate us on the possibilities?

### Required Skills

- Strong working knowledge of ReactJS
- HTML5, CSS, JavaScript, cross-browser techniques
- Passionate about UX and the challenge of designing elegant UIs for non-tech-savvy users
- Creative with both code & markup
- 5+ years of web app development experience
- Bonus: mobile dev (React Native / Flutter), Spring or NodeJS
