

## ***Sr./Staff Software Engineer -User Interface (UI)-Remote Arg-***

- ✓ Full time
- ✓ 100% Remote
- ✓ Permanent Employee
- ✓ Argentina
- ✓ Excellent English requested

### ***Who we are***

We power model-driven businesses with our leading Enterprise AI platform trusted by over 20% of the Fortune 100. We accelerate the development and deployment of data science work while increasing collaboration and governance. With our platform, enterprises worldwide can develop better medicines, grow more productive crops, build better cars, and much more. Founded in 2013, we are backed by Coatue Management, Great Hill Partners, Highland Capital, Sequoia Capital and other leading investors.

### ***UI Team's Mission***

The UI Team's mission is fourfold, 1) enable feature development within the ProdEng pods where capacity/expertise is lacking relative to feature Created October 2024 requirements, 2) update our UI to enhance look and feel across the entire UI through the definition and implementation of design components, 3) maintain the frameworks in our UI (e.g. upgrade React to the latest version), 4) set best UI development practices, improve test coverage, increase FE development efficiency, and enhance FE quality.

### ***What we look for in this role***

- ✓ Demonstrated track record of delivering quality web applications or components
- ✓ Demonstrated ability to debug and troubleshoot JavaScript and UI (user interfaces)/CSS (Cascading Style Sheets) issues and knowledge of optimizations for high performance user experiences.

#### **Skills:**

- ✓ Proficiency with a modern frontend technical stack (TypeScript, JavaScript, React + Redux). React is preferred, but deep experience with Angular and Vue may also be considered
- ✓ Experience working with modern front-end build tools and practices (e.g. Vite, Node, NPM, Yarn, WebPack).
- ✓ Working proficiency in modern Javascript testing stack (e.g., Jest, etc.)
- ✓ Nice to have: Expertise in Scala or other JVM based programming languages like Java, Kotlin etc
- ✓ Nice to have: Some understanding of Kubernetes operators, Helm charts etc
- ✓ Nice to have: Data science workflows and experience with MLOps platforms

**Abilities:**

- ✓ Egoless
- ✓ Capable of working on multiple projects at once
- ✓ Resilient to change
- ✓ Applies solid design thinking where ambiguity exists

***What we value***

- ✓ We value a growth mindset. High-performing creative individuals who dig into problems and see the opportunities for success
- ✓ We believe in individuals who seek truth and speak the truth and can be their whole selves at work
- ✓ We value all of you that believe improving is always possible . With us Everything is a work in progress – we can do better at everything
- ✓ We emphasize an environment of teaching and learning to equip employees with the tools needed to be successful in their function and the company
- ✓ We strongly believe in the value of growing a diverse team and encourage people of all backgrounds, genders, ethnicities, abilities, and sexual orientations to apply

***What we offer***

- ✓ Family Health Insurance (Osde 410)
- ✓ Unlimited Vacations (PTO)
- ✓ Argentine holidays
- ✓ No timezone shifting (Argentina Time)
- ✓ Compensation in US Dollars
